

ESTABLISHING A **NEW STANDARD** IN THE FOODSERVICE INDUSTRY.

Full glass door unit features energy-efficient HC refrigerant with minimal charge, spark-free components, and the most competitive utility costs in its category, all while providing enhanced product visibility.

KEY FEATURES

•Intuitivo Cooler

Combining Machine Learning with Computer Vision, Intuitivo is building a unique infrastructure that allows installation of thousands of A-POPs at an unprecedented speed and cost.

•High-Speed Secure Pop-Out Cameras

Three external cameras (two on top, one on the side) capturing at 60 frames per second for reliable capture of product purchases.

•Eco-Friendly Refrigerant

Environmentally friendly hydrocarbon refrigerant has low Global Warming Potential (GWP). Meets all USA and California refrigerant and energy standards.

•High Power Reliable Refrigeration System

Refrigeration System Fast pull down, optimal internal air circulation and reliable refrigeration, maintaining colder temperatures for food preservation.

•Standard LED Lighting System

Ultra bright low energy interior LED illumination system provides optimal merchandise display visibility. Low profile, door mounted, clip-in LED design.

•Roller Base for Easy Installation

The cabinet is equipped with a roller base, allowing for effortless movement and precise placement during installation, plus 4 leveling legs required for cabinet stability.

•NAMA Insight Health Lock

Health timer system can be turned ON for perishable foods, or OFF if not required for the V9 Southco smart lock. Intuitivo AI connectivity required for online unlocking, and temperature history for perishable food safety management. A manual unlock button is located 12" behind bottom grill, for power outages and health inspector testing.

Intuitivo. Meet them halfway.

With Intuitivo you will be super close to your customers, through thousands of autonomous points of purchase powered by AI and Computer Vision.

Features

3 secure pop-out cameras 'outside cabinet' [2 top + 1 side]. High speed 60 x frames per second.

Cloud based product recognition and transaction processing reduces hardware cost & data accessibility.

QR code payment solution uses consumer's smart phone for transactions.

Available in large VR27 Cooler & VA27 Ambient models, for refrigerated & other sales merchandise.

Deep Tech and a Clear Vision

Their technology allows them to train our Intuitivo's Computer Vision Pipeline on complete brand portfolios at an unprecedented speed and cost.

This will enable you to create as many planograms as you want, which will allow you to understand your consumers buying behaviors and adjust your business strategies accordingly.

Perfect Purchases in Seconds

Intuitivo's Autonomous Points of Purchase, A-POPs, are the most effective way of bring your products closer to your customers, offering them a seamless shopping experience and having one-on-one conversations with them.

**Building the Infrastructure
for the Future of Retail.**
